

Avaloq Operation

IT Operation Management – Training Programme

This course provides an introduction to the Avaloq Banking System from an IT operation perspective. By offering participants both a concise overview and solid functional know how, the course gives them the tools needed to take on daily and periodical operational activities in production.

Orbium Training Services helps empower your team members in IT operation so that you can get the most from your Avaloq installation. Our course covers the following areas:

- Avaloq Introduction
- Standard interfaces
- Output management module
- Hands-on operational exercises based on production scenarios
- Avaloq administration application – Central Services
- End-of-period concepts

The course will help your IT staff to:

- Get to know the Avaloq Banking System from both an operational and administrative perspective
- Understand the operational components of Avaloq
- Ensure IT productivity through specific workload management
- Assume responsibility for first level issue handling in a production environment
- Reduce and optimise IT costs and mitigate operational risks
- Improve and simplify system administration through appropriate Avaloq applications.

Duration: 4 days

Designed specifically for IT professionals, this course is the fruit of our considerable Avaloq experience. Throughout the course, the emphasis is on practical, real-world examples and hands-on exercises. By the end, participants will have the skills needed to perform daily or periodic operations and support activities in a project and/or production environment. They can sit a final exam to obtain an Avaloq Banking System Operations certificate.
