

# Avaloq Security

## IT Operation Management Training Programme

**This course provides an insight into the Avaloq Banking System from an IT security perspective. It gives participants the operational and administrative skills they need to perform user management and Avaloq security-related activities.**

**Orbium Training Services** helps empower your team members in IT security so that you can get the most from your Avaloq installation. Our course covers the following areas:

- Avaloq Introduction
- Avaloq security concepts
- Avaloq user management
- Maintenance of a production security setup
- Avaloq security-related troubleshooting
- SecurEasy application

The course helps your IT staff to:

- Get to know the Avaloq security engine
- Understand, run and maintain Avaloq security
- Mitigate IT security risks
- Assume responsibility for first level issue handling in a production environment
- Increase IT efficiency
- Improve service delivery to the core business

Duration: 4 days

Based on real-world banking business cases and production scenarios, this unique course gives an insight into Avaloq security and typical security-related challenges. Throughout the course, the emphasis is on practical examples and hands-on exercises. By the end, participants will have the skills needed to run and maintain Avaloq security in a project and/or production environment. They can sit a final exam to obtain an Avaloq Banking System Security certificate.
